**STRONGER PART
DUE TO LARGER WELDS**

NEW 43,1mm

OLD 25,5mm

**A NEW DESIGN
WITH STURDY RUBBER**

NEW

OLD

Challenge

How to improve the life cycle of popular Volkswagen wishbone arms ensuring a reduction in premature wear and thus avoiding early replacement.

Easy Solutions

To ensure that the wishbone parts have an increased lifecycle several actions and improvements were taken. **Larger welds** are now in place to strengthen the fixation of the bushes to the arm. In addition the **vertical bush has a new optimized design and features an enhanced rubber** compound that prevents excessive movement during transit improving significantly the lifetime of the parts.
